1. European Public Health Conferences, Glasgow 2014, Milan 2015, Vienna 2016

Glasgow 2014: accreditation points

We are pleased to inform you that the 7th European Public Health Conference in Glasgow, UK, was granted **23 European CME credits** (ECMEC) by the European Accreditation Council for Continuing Medical Education (EACCME).

Glasgow 2014: don't miss the early registration deadline

Already 1'000 colleagues have preceded you in registering for the 7th European Public Health Conference. Register before the 1st of October to benefit from the early bird fee at [Register now!](#)

Milan 2015: first announcement

The first announcement for Milan is now available at: [Milan 2015](#)

Vienna 2016: main theme selected

The main theme for Vienna 2016 has just been selected by the main organisers:

'All for health – Health for All'

Find out more by downloading the welcome card: [Vienna 2016](#)

2. EUPHA update

EUPHA shares concern on decision to decrease DG Health portfolio

EUPHA shares the widespread concern that has been voiced by civil society organisations at the decision to transfer responsibility for drugs policy and the European Medicines Agency back to the Directorate-General for Enterprise and Industry, reversing the 2009 transfer of these responsibilities to the Directorate-General for Health. We regard this as an alarming and retrograde step with potentially profound implications for public health, quality of medicines, and the security of European citizens. We have three main concerns.

<http://www.eupha.org/site/publications.p...>

EUPHA supports WHO evidence-based publication on electronic cigarettes

The European Public Health Association (EUPHA), representing 14'000 public health professionals in 40 countries, strongly supports the evidence-based position taken by the World Health Organization (WHO) following publication of its report on Electronic Nicotine Delivery Systems (ENDS), more commonly known as electronic cigarettes. EUPHA shares the concerns expressed by the WHO about the safety of these products.

<http://www.eupha.org/repository/publicat...>

EUPHA welcomes new EU Commissioner for Health

EUPHA enthusiastically welcomes the nomination of Dr Vytenis Andriukaitis as the next European Commissioner for Health and Food Safety. Dr Andriukaitis has a very distinguished career as a physician and politician and, as Lithuanian Health Minister, has been a powerful

advocate for public health. EUPHA looks forward to working with him during his tenure in the Commission.

3. Call for proposals, job opportunities

Warwick University: Assistant Professor in Health Economics / Decision Modelling 1

[Assistant Professor in Health Economics / Decision Modelling](#)

Warwick Medical School

Division of Health Sciences: Warwick Evidence

Salary: £38,511 to £45,954 per annum

Deadline: 3 October 2014

Warwick University: Assistant Professor in Health Economics / Decision Modelling 2

[Associate Professor in Health Economics / Decision Modelling \(75183-094\)](#)

Warwick Medical School

Division of Health Sciences: Warwick Evidence

Salary: £47,328 to £58,172

4. Interesting News

e-Cigarettes commentaries in IJPH free online

The use and regulation of e-cigarettes is hotly debated and the [World Health Organization](#) WHO, as the global authority for public health, has come under pressure from both pro-e-cigarette as well as contra-e-cigarette advocates. In contrast to the traditional tobacco debate with the public health research community arguing on one, and the tobacco industry and its constituencies on the other side, the current stage of the e-cigarette debate finds honest and independent public health scientists on both sides. Although it is obvious which one the tobacco and e-cigarette industries applaud, the more interesting question is why the public health community does not yet speak with “one voice”. In this issue, IJPH has invited two commentaries—both written by independent public health scientists—to express their current views. <http://link.springer.com/article/>

The Nation's Health: Wearing a helmet while cycling can keep you safe

As kids head back to school, college students traverse campuses and the weather starts cooling off, fall is a great time for a bicycle ride. After all, biking is a great way to stay active and healthy. [Research shows](#) that it can be good for the environment, too. Whatever reason you decide to ride a bike, there's one important accessory to include: a helmet. Cyclists who [ride without helmets are at an increased risk](#) for head injury, according to the Centers for Disease Control and Prevention. How many cyclists ride without wearing a helmet? [Almost half, CDC says](#).

<http://www.publichealthnewswire.org/>

Study: Healthy lifestyle behaviors may prevent 80 percent of heart attacks

Five recommended health behaviors may prevent four out of five heart attacks in men, a new study suggests. Middle-aged and older men were much less likely to have heart attacks over an average of 11 years if they drank moderately, didn't smoke and did everything right on the diet, exercise and weight fronts, the study found.

Only about 1 percent of men involved in the study fit into this ultra-healthy-living category. But they were 86 percent less likely to have heart attacks than those who ate poorly, were overweight, exercised too little, smoked and drank too much alcohol, the researchers said.

<http://www.publichealthnewswire.org/>

Smoke-free building policies cut indoor exposure: study

Apartment dwellers who don't smoke still can't escape second-hand smoke completely, but in smoke-free buildings exposure to the tiny particles in cigarette smoke may be cut by half or more, according to a new study.

Researchers in Boston monitored indoor air at public housing projects transitioning to a smoke-free policy and tracked **tobacco** smoke as it traveled to adjacent apartments and down common hallways. <http://www.publichealthnewswire.org/>

E-cigs don't help cancer patients quit smoking

New research raises doubts about the possible benefits of e-cigarettes for people with **cancer**. Smokers with cancer who used e-cigarettes along with traditional cigarettes were more dependent on nicotine than those who didn't use the devices, a Memorial Sloan-Kettering study found. These patients were also just as likely — or less likely — to have **quit smoking** than patients who didn't use e-cigarettes.

The study, published online Sept. 22 in *Cancer*, involved almost 1,100 cancer patients who smoked. Between 2012 and 2013, the patients were enrolled in a tobacco treatment program at a comprehensive cancer center. <http://www.webmd.com/cancer/news/>

Do you want to learn (more) about public health epidemiology?

Elevate Health offers the online course Public Health Epidemiology: highly suited to epidemiologists or public health workers in universities, hospitals, municipal health services and other governmental health organizations, and to PhD candidates working on epidemiological or public health research.

In only 3 weeks you'll learn about the basic principles, important measures of population health, their interpretation and use in public health policy. Recent cases such as the Ebola outbreak will be discussed. In addition, the effects of an exposure on life expectancy, prevention strategies and the societal, economic and health dilemmas involved in introducing population measures are covered. In this interactive online course, you'll study by means of web lectures and group assignments.

*Starts 13 October * 3 weeks, ca. 14h p/w * 1.5 EC * € 785*

Are you ready to enroll? <http://elevatehealth.eu/PHE>

Monitoring health inequality: An essential step for achieving health equity
World Health Organization (WHO) September, 2014
Download the booklet [here](#)!

NEW PUBLICATIONS ISSUED BY WHO - AUGUST 2014

[From Malaria Control to Malaria Elimination](#)

The main purpose of this manual is to raise awareness of the sorts of technical, operational, and financial resources that would be required to reduce and eventually eliminate malaria, the timelines over which such reductions are likely to be achieved, and how they can be sustained.

[Birth Defects Surveillance](#)

This manual is intended to serve as a tool for the development, implementation and ongoing improvement of a congenital anomalies surveillance programme, particularly for countries with limited resources. The focus of the manual is on population-based and hospital-based surveillance programmes.

[Birth Defects Surveillance: Atlas of Selected Congenital Anomalies](#)

This atlas of selected congenital anomalies is a companion tool to Birth defects surveillance: a manual for programme managers, and is intended to help in the development, implementation

and ongoing improvement of a surveillance programme for congenital anomalies, particularly in countries with limited human and financial resources.

[Road Map for Surveillance and Monitoring of HIV Drug Resistance in the Western Pacific Region \(2014-2018\)](#)

This Road Map 2014-2018 provides a plan for specific and coordinated action to address the potential threat of HIV drug resistance emergence in countries in the Region.

[Action Plan for Healthy Newborn Infants in the Western Pacific Region \(2014-2020\)](#)

This Regional Action Plan identifies bold steps that can be taken to provide all newborn infants with a set of appropriate health-care interventions.

[Towards Universal Eye Health](#)

While the main objectives of this publication are aligned with the global action plan for the prevention of avoidable visual impairment, this Regional Action Plan provides a regional context for WHO support to help address specific needs in Asia and the Pacific.

[Nurses and Midwives in Action during Emergencies and Disasters](#)

This publication presents fifteen selected case studies which highlights the multitude of roles and contributions of nurses in different settings, in times of emergencies and disasters, and the analysis of community, health system and nursing and midwifery needs during times of ongoing health threats and disasters.

[Health in all Policies: Report on Perspectives and Intersectoral Actions in the Western Pacific](#)

The 2010 Adelaide Statement operationalized intersectoral action ISA in the form of the Health in All Policies (HiAP) approach to address the social determinants of health, outlining new governance arrangements to facilitate ISA (WHO and Government of South Australia, 2010). This report considers how the globalized concepts of ISA, and current understandings of the relatively new concept of HiAP, correspond to the diverse local contexts of the Western Pacific Region.

[Addressing Diseases of Poverty](#)

Neglected tropical diseases (NTDs) elimination and control efforts are recognized as one of the most cost-effective interventions in global health today. As a joint production by the World Health Organization Regional Offices for South-East Asia and the Western Pacific, the Asian Development Bank and the Global Network for Neglected Tropical Diseases at the Sabin Vaccine Institute, this publication highlights the need for greater crosssectoral partnership and additional investments.

[Health Financing Country Profiles in the Western Pacific Region \(1995-2011\)](#)

This publication provides concise overviews of the health financing systems of Member States of the Western Pacific Region.

[The Health of Older People in Selected Countries of the Western Pacific Region](#)

This report provides an overview of population ageing and the health of people aged 60 years and above in the Western Pacific Region.

[Regional Framework for Action on Ageing and Health in the Western Pacific \(2014-2019\)](#)

All countries are exploring ways to help older people retain their health, functional capacity, social participation and security. Population ageing brings new challenges to health policy and health systems, but also new opportunities and areas for action. This Regional Framework for Action on Ageing and Health in the Western Pacific explores these challenges and areas of action.

[Practical Approaches to Risk Minimisation for Medicinal Products](#)

Until this current CIOMS IX document, limited guidance has been available on how to determine which risks need "additional risk minimisation," select the appropriate tools, apply and implement such tools globally and locally, and measure if they are effective and valuable. Included in the report is a CIOMS framework for the evaluation of effectiveness of risk minimisation, a discussion of future trends and developments, an annex specifically addressing vaccines, and examples from real life.

[Bulletin of the World Health Organization, Vol. 92, No. 8, 2014](#)

As the flagship periodical of WHO, the Bulletin is a leading international voice on public health issues. This peer-reviewed monthly draws on the expertise within WHO to provide a vital resource for those interested in research, policy issues and debate on international public health, particularly the problems confronting developing countries.

[WHO Drug Information, Vol. 28, No. 2, 2014](#)

WHO Drug Information communicates pharmaceutical information that is either developed and issued by WHO or transmitted to WHO by research and regulatory agencies throughout the World. The journal also includes regular presentations of newly proposed and recommended International Nonproprietary Names (INN) for Pharmaceuticals Substances.

BOOKS IN GERMAN

[European Health Report 2012 \(The\) \(GERMAN\)](#)

This report presents the health status of Europe, providing policy-makers and public health professionals with the epidemiological evidence base that underpins Health 2020, the new European policy framework.
